

I claim:

1. A garment for draping about the neck, said garment having a configuration comprising:
  - (a) first and second sections that are both either conic or pyramidal; the first and second sections are of substantially equal size arranged on opposite sides of a vertex, the first and second sections are joined at the vertex;
  - (b) a vertex is at a fixed point situated generally along a first direction; the proximal portion of each of the first and second sections is situated about the areas where the vertex joins such sections; the medial portion of the garment generally extends along the first direction between the proximal portions of the first and second sections; and
  - (c) when the garment is draped around an area of the body, the first and second sections form a generally collapsed cone-shaped configuration.
2. The garment of claim 1, wherein the ends of said distal portions furthest away from the vertex extend generally in a direction perpendicular to the first direction.
3. The garment of claim 1, wherein the ends of said distal portions furthest way from the vertex along the first direction is elliptic.
4. The garment of claim 1, wherein the ends of said distal portions furthers way from the vertex along the first direction is cheveroned.
5. The garment of claim 1, wherein the vertex joining the first and second sections is truncated.
6. The garment of claim 1, wherein the first and second sections are separated by tan elongate.

7. The garment of claim 1, wherein the garment has an elongated tube extending along the first direction between the first and second sections.
8. The garment of claim 1, wherein the fabric comprises substantially stretch resistant and absorbent material.
9. The garment of claim 8, wherein said substantially stretch resistant and absorbent material is selected from the group consisting to Turkish terry, French terry, velour, baby terry, boucle or any combination thereof.
10. The garment of claim 8, wherein said substantially stretch resistant and absorbent material is a single sided terry.
11. The garment of claim 1, wherein the fabric comprises an insulating material.
12. The garment of claim 11, wherein the insulating material is selected from the group consisting of wool, microfiber, fleece or and combination thereof.
13. The garment of claim 13, wherein the insulating material comprises a water repellant material
14. The garment of claim 13, wherein the water repellent material is selected from the group consisting of nylon, rubber, plastic, Teflon or any combination thereof.
15. The garment of claim 1, wherein the fabric is selected from the group consisting cotton, linen, silk, nylon, rayon, mesh, leather, velvet, cashmere, camel hair or any combination thereof.
16. The garment of claim 1 having at least one pocket between the distal and the proximal portions of the first and second sections.
17. The garment of claim 16, wherein said pockets having means for opening and closing said pocket.

18. The garment of claim 1, wherein said garment has at least one fasten means along the edges of the first and second sections.
19. The garment of claim 1, wherein either of said first and second section is emblazoned.
20. The garment of claim 1, wherein said first and second sections are fastened to each other along their respective edges to form a poncho, camisole, chair over or seat cushion. - -
